INJECTABLES

Wrinkle Relaxers

Reduce fine lines and wrinkles around the eyes and forehead by reducing facial muscle movement. Lasts about 3 to 5 months.

Hyaluronic Acid Dermal Fillers

HA gel used to fill in fine lines and wrinkles as well as add volume. Reshape lips, jawline, nose, and eliminate under eye depressions and dark circles. Results last about 6 to 8 months.

BellaFill

5 year filler that corrects mild facial creases and stimulates natural collagen for a natural, long lasting result. Also used to reduce appearance of acne scars and pitting.

Sculptra Aesthetic

Collagen stimulating product used to add volume to depleted areas of the face that lasts about 18 to 24 months. Can also be used for a non-surgical butt lift.

Deoxycolic Acid

Reduce unwanted fat from under the chin, abdomen, flanks and back, etc. Can also be used for mild cellulite dimpling. Results are permanent and product amounts vary upon treatment size.

Sclerotherapy

Reduce unsightly spider veins on legs with a series of treatments.

CELLULITE REDUCTION

Cellfina

Only FDA approved treatment for the reduction of cellulite on the thighs and buttocks. Results are permanent and money back guaranteed. Consultation required.

LASER THERAPY

Hair Reduction

Permanently remove unwanted hair from any body area quickly and effectively. Any skin tone can be treated without damaging the surrounding skin. Packages available.

Vein Reduction

Using directed laser energy, small facial veins around the nose and cheeks can be eliminated in a series of treatments.

Tattoo Reduction

Erase unwanted tattoos with a series of laser treatments. Results depend on the age of the tattoo, type of ink used, color of ink, etc.

SKIN REJUVENATION

Vivace

Radio frequency micro-needling that stimulates collagen and elastin on areas of the face and body. Improves skin texture and tone. A series of 3 is recommended.

Micro-needling

Tiny micro needles wound the epidermal layer to induce collagen production as well as open channels in the skin to allow therapeutic products to penetrate deeply.

IPL (Intense Pulse Light)

Light energy targets brown and red irregularities to lighten and brighten the skin. Pigmentation and redness can be addressed in a series of treatments. Also assists with overall tone and firming of the skin. Daily sunscreen is recommended to maintain results.

eMatrix Sublative

Radio frequency heat stimulates collagen and elastin production resulting in firmer, tighter skin. A series of treatments are recommended.

PRP/PRF (Plasma Rich Platelet/Fibrin)

Blood taken from the patient is spun in a centrifuge to extract the healthy, protein rich plasma. PRP can be applied to the skin post micro-needling or Vivace; or injected directly into the skin by itself or combined with a hyaluronic acid filler.

Plasma Pen

Delivers nitrogen plasma energy to the skin's surface to significantly tighten, lift, resurface and rejuvenate the skin. Ideal for eye and lip area.

Chemical Peels

Gentle acids applied to the skin initiate a light flaking of the dead surface cell layer, to reveal fresh, healthier looking skin. More aggressive peels with more downtime are also available to combat sun damage and overall skin aging.

Hydrafacial

A 30 minute 3 step treatment that cleanses, exfoliates and hydrates even the driest, most compromised skin. Includes extractions. A peeling agent can also be used to increase exfoliation.

SaltFacial

Skin Renewal treatment that uses natural sea salt to exfoliate, ultrasound technology to replenish and LED photo therapy to rejuvenate. Ideal for aging skin.

Dermaplaning

Exfoliation of surface cells and removal of fine vellus hair using a medical grade blade resulting in softer, smoother skin. Products used penetrate easier and makeup goes on effortlessly.

Deep Pore Cleansing Facial

Cleanse, exfoliate, tone and increase circulation for clearer, healthier skin. Recommended monthly.

FEMININE WELLNESS

ThermiVa

A 30 minute, noninvasive treatment that uses gentle radio frequency heat to remodel collagen and elastin lost due to natural aging and childbirth. ThermiVa treats overall skin laxity, vaginal dryness, incontinence and sexual dysfunction.

PERMANENT COSMETICS

Eyebrow Microblading

Semi-permanent form of eyebrow tattooing provides a customized shape to the eyebrow. The pigment can be applied in strokes so the final look appears more natural. Two treatments are needed at first and results can last up to 3 years with touch up appointments every 6 to 12 months.

Eyeliner

Using a tattoo pen, semi-permanent pigment is applied to the upper or lower part of the eye lid to eliminate the need to apply eyeliner makeup daily. Results last about a year.

EYEBROWS

Eyebrow shaping, tinting and waxing is available to create a new look or enhance the natural shape and color of your own eyebrows.

EYELASHES

Thicken and lengthen the appearance of eyelashes with "Classic" for a natural look or "Volume" for a more dramatic look. Full sets available and lash fills recommended every 2 to 3 weeks.

HAIR RESTORATION

PRP (Plasma Rich Platelets)

Your own healthy plasma can be micro-needled or injected directly into the scalp to enhance overall hair growth and thickness.

Keravive

The Hydrafacial for the scalp! Remove dead skin and oils from the scalp resulting in healthier, softer looking hair. Can be used in conjunction with PRP treatments for maximum results.

Scalp Pigmentation

Fill in areas of scalp where hair is thin or has stopped growing using a tattoo pen. Consultation required to determine pricing.

B12 Shot

Energize, boost metabolism and enhance concentration with a weekly or bi-weekly shot of B vitamins. Packages available.

Vitamin D Shot

Aid in healthy bone development and maintain normal blood levels of calcium and phosphorus. Helps protect against osteoporosis, high blood pressure and other diseases. Packages available.
